

ENVIRONMENTAL PROTECTION POLICY

Olaine Chemical Plant BIOLAR has developed an Environmental Protection Policy to ensure the sustainable development of the Company in accordance with the requirements of environmental legislation and compliance with all applicable laws and regulations regarding environmental protection.

This Policy has been developed in accordance with the basic principles, rules and requirements of the "Environmental Management System" ISO 14001.

The goal of the Company in the field of Environmental Protection Policy is to ensure the activities of the enterprise, creating a favorable and safe working environment. The development projects of the Company are aimed at maximum protection of the environment and avoiding its pollution.

This Environmental Protection Policy is based on the following principles:

- Improving the energy efficiency of the enterprise to minimize energy consumption and greenhouse gas emissions;
- Mitigating risks in the event of an industrial accident, if any;
- Reducing the level of environmental pollution;
- Rational use of all types of resources;
- Assessment of the environmental impact of new industries and technological processes before their launch;
- Application of environmental protection technologies;
- Taking action to reduce hazardous waste;
- Increasing the sorting and processing of waste, and their recycling;
- Continuous monitoring and improvement of the operation of biological wastewater treatment plants;
- Replacement of highly hazardous chemicals with less hazardous ones;
- Safe handling of all kinds of materials;
- Informing employees about significant environmental aspects in the Company's activities;
- Stimulation of environmental consciousness among all employees of the enterprise at every workplace. Training of all employees so that everyone understands the impact of their work on the environment;
- Integration of environmental protection policy in all areas of the Company's activities;
- Regularly informing stakeholders and society about the Company's activities in the field of environmental protection and compliance with the environmental requirements of the European Union.
